Introduction to Feature Engineering.

→ Process where you will be using your domain knowledge to extract new features that will help your ML algorithm to perform in a better way.

Family member ← Sib + Spouse + Child + Parents ✓

basic 4 Pillars of ML algorithms

- ✓ 1) missing value Imputation.
- ✓ 2) Handling Categorical features. → string ('a' 'word')
- ✓ 3) outlier detection.
- ✓ 4) Feature Scaling.

... more extract.

Cleaning Your noisy dataset.

- Dropping unwanted columns.
- Handling date & Time
- Binning & Binarization
- Feature construction & Extraction.
